Subject: Re: Information Request

Dear Kwan,

I am aware that you may be upset about what is happening at the board level, and I am very sorry about that. But why do you want to hurt Urantia Foundation?

This is the group which allowed you to change the world by printing your translation, making you a trustee, trusting you to be loyal, and giving you untold hours of camaraderie and friendship to both you and your wife. You were given a position in the organization of readers as a leader of men. If, as you say, this group wants you to leave, why would you want to stay? You have served well, and would not it be better to leave in peace and in a brotherly fashion.

You would still be part of the worldwide group and have much status by being part of the foundation as a trustee emeritus, and by continuing to help the foundation all over the world. I cannot for the life of me understand why you would want to hurt this 50 year old foundation devoted to disseminating the inviolate text, including your translation, throughout the world for the benefit of all mankind, not just our own pride.

I respect all of the work you have done for the revelation, and so does everyone else, and pray that you can find it within your heart to forgive whatever wrong you think has been done and get on with the work of the Father.

Regarding your requests;

You have received over the years that you have been a trustee all of the documents that have been given to all the trustees. You have received monthly, and sometime weekly reports. You have all of the minutes. You have been privilege to all information that the president of Urantia Foundation has authorized.

Mo did not complain about the fund accounting, he was referring to the PPF and the new one that we want to apply to all of the translations. We are audited every year and you have received those audits as a trustee. Please refer to those for the information you want to access. Any other information will have to go through the BOT.

To do what you have laid out below would take all of my staff weeks to find, if indeed it is still on computers and in files, information that you have already received.

I pray that you may find it within your heart to do no more damage and to

let this all go, and continue your superior job of assisting the revelation in Korea and elsewhere throughout the world. Have no fear, in the end our Father knows all, sees all, and judges all.

Sincerely,
Tonia
